Hi Amar/Rupak

While integrating the application tomorrow, implement these minor UI changes in landing page and report in addition to other minor feedbacks.

1. Add a link to download training help manual on dashboard page.

2. Text on homepage needs to be updated. Added text file which is to be replaced.
3. Web Application landing page Should have title as follows
Scheme for Recognising Sample Collection Centre/Facility of Medical Testing Laboratory
4. On homepage, in place of Quick statistics NABL Logo and QCI logo are to be placed.
5. Assessment report/pdf has few feedback mentioned below in the attachment
6. Change the wording of : <u>Resolved NC's to Closed NC's</u> **in the summary section of assessment report.**
7. In report, Colour of **NABL logo is to be changed from red to Blue** (at all places wherever used) and on right side please keep QCI logo also (as mentioned in the sample /attachment letter head), Do not use ILAC logo

Header of report should name mentioned in the letter head

Lastly, i am re-attaching the letters/emails to be configured with app

Regards

Preeti
